

4th International CILS4EU User Conference

September 27-28, 2021

PROGRAMME

The focus of the CILS4EU data is on processes of integration of adolescents and young adults including the cognitive-cultural (e.g., language skills and usage), structural (e.g., educational, and occupational success), social (e.g., friendship formation and partner choices) and emotional-cultural dimension of integration (e.g., religion or identity). Therefore, the 4th International CILS4EU User Conference brings together scientists with a wide range of research topics from different countries.

The conference gives users the opportunity to present their ongoing or completed work, to receive comments and suggestions, to share their experiences with the data, and to get into contact with other CILS4EU data-users and the international CILS4EU-team.

The conference will take place online via Zoom.

Please note that every presentation is assigned a discussant. We kindly ask discussants to read the paper or presentation sent to them before the start of the conference and comment on the respective presentation within their session.
