# 1 Introduction

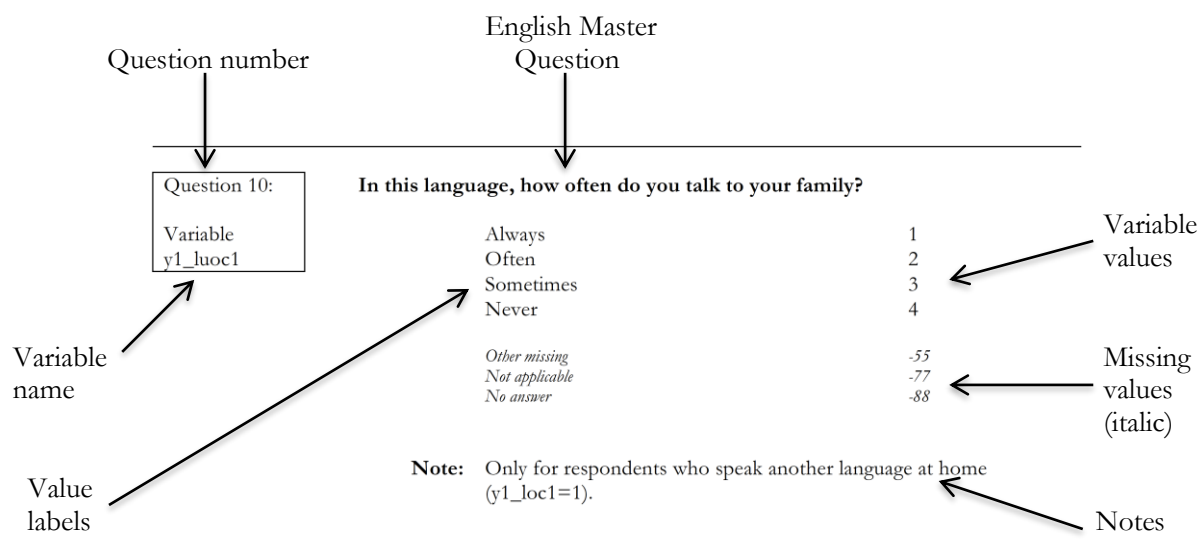

This codebook offers a complete documentation of the fifth wave of data collected in the “Children of Immigrants Longitudinal Survey in Four European Countries - Germany” (CILS4EU-DE). An overview of the different data sets is given in the table below. The data sets can be merged using the unique identifier variable `youthid`.

Germany		
Part	Version	
Youth main	Full	w5_ym_ge_v6.0.0.dta
	Reduced	w5_ym_ge_v6.0.0_rv.dta

For each data set, a reduced version and a full version exist. A comparison between these two versions can be found in Appendix G.

The structure of the codebook is oriented to the data structure, including separate subsections for the different data sets.

Section 2 provides an overview of all variables: ordered by topic (section 2.1) and ordered according to how they appear in the data set (section 2.2). By clicking on the page number on the right-hand side in the digital version, information about this variable can be retrieved:

Negative values indicate different types of missing values:

Code	Label	Description
-99	Don't know	Only if this option was provided in the questionnaire
-88	No answer	No box ticked/no answer given
-77	Not applicable	Not answered due to filter question
-66	Question not asked	Not asked in a country/mode
-55	Other missing	Answers that could not be coded, fun answers
-44	Interrupted Interview	Only for telephone and online modes
-33	Not available in reduced version	Answers not available in the download version

Notes contain further specificities for the respective variables. In general, the following information can be found in the notes:

- Question was not asked in one or more modes.
- Question was not asked due to filter question.
- Further variables closely related to the variable.
- Variable is not included in the reduced version of the data set.
- Multiple answers are possible.

In general, all variables reflect questions included in the questionnaires. However, several adaptations were necessary, which can pertain to the following procedures and which can be identified by a certain ending of the variable name:

1. Generated variables (variable name ending with G)

Example: The variable `y5_a_iseiG` informs about the international socio-economic index of occupational status of the respondent's apprenticeship. It was generated using detailed information in which profession he/she is doing an apprenticeship in.

2. Country-specific variables (variable name ending with CS)

Example: Due to divergent educational systems in the four CILS4EU countries, categories for respondents' current situation differs sharply between countries. Therefore, a country-specific variable `y5_csit3CS` is included in the data set that contains a total of 20 categories for every answer possibility in the four countries.

3. Harmonized variables (variable name ending with H)

Example: The current situation `y5_csit3H` was harmonized for England, Germany, the Netherlands and Sweden. This means that categories were made comparable in the respective harmonized variables by combining several categories. The harmonized variable distinguishes "school", "apprenticeship/work-related training", "studying", "full-time job", "internship" and "something else". Original answers are still available in the country-specific variables (see above).

4. Reduced-version variables (variable name ending with RV)

Example: Complete information on the respondent's apprenticeship's 4-digit ISCO code `y5_a_isco08` is not available in the reduced version of the data. Instead, we offer a reduced version of this variable `y5_a_isco08RV`, which entails the 2-digit ISCO code. This variable is also included in the full version of the data.

### 3.7.2 Apprenticeship/work-related training

Question 75:

Variable  
y5\_a\_isco08

**In which profession are you doing your apprenticeship/work-related training? Please name the exact title.**

Numeric:	F 4.0
<i>Not available in reduced version</i>	-33
<i>Interrupted interview</i>	-44
<i>Other missing</i>	-55
<i>Not applicable</i>	-77
<i>No answer</i>	-88

**Note:** Only for respondents who currently attend any type of vocational school ( $y5\_s\_csit2CS \geq 14$  &  $y5\_s\_csit2CS \leq 18$  |  $y5\_s\_csit2CS = 20$ ) or who are currently doing an apprenticeship/work-related training ( $y5\_csit3H = 2$ ). ISCO 2008 was coded using this question. An overview of the major, sub-major and unit groups is provided in Appendix A. Using this variable, the international socio-economic index of occupational status (ISEI) (variable: y5\_a\_iseiG) and SIOPS (Treiman's) prestige score (variable: y5\_a\_siopsG) were constructed. This question is not available in the reduced version (reduced-version variable: y5\_a\_isco08RV).

Question 75:

Variable

## 4.2 Appendix G: Differences Between Full-Version and Reduced-Version

Due to data security reasons, two different versions are available for each data set: (1) a version with complete information collected during the survey (full version) and (2) a version in which specific information was reduced and aggregated in order to prevent the identification of single respondents (reduced version).

The structure of the full version and the reduced version of the data set is identical. This means that in both versions the same variables are included, but the variables encompass different information depending on the version of the data set. Variables with reduced or aggregated information are marked with an “RV” at the end of the variable name.

In the following overview, the differences between the full version and the reduced version of the data are listed.

## 4.2.1 Youth main questionnaire
