1 Introduction

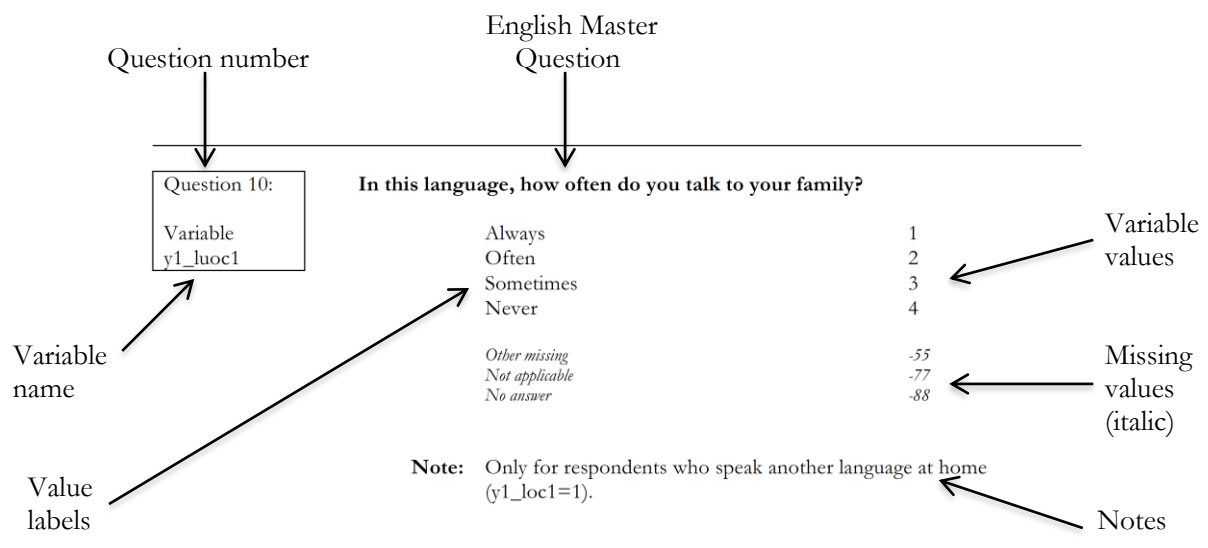

This codebook offers a complete documentation of the seventh wave of data collected in the “Children of Immigrants Longitudinal Survey in Four European Countries - Germany” (CILS4EU-DE). An overview of the different data sets is given in the table below. The data sets can be merged using the unique identifier variable `youthid`.

Germany		
Part	Version	
Youth main	Full	w9_ym_ge_v7.0.0.dta
	Reduced	w9_ym_ge_v7.0.0_rv.dta
Youth vignette	Full	w9_yv_ge_v7.0.0.dta
	Reduced	w9_yv_ge_v7.0.0_rv.dta

For each data set, a reduced version and a full version exist. A comparison between these two versions can be found in Appendix G.

The structure of the codebook is oriented to the data structure, including separate subsections for the different data sets.

Section 2 provides an overview of all variables: ordered by topic (section 2) and ordered according to how they appear in the data set (section 2.2). By clicking on the page number on the right-hand side in the digital version, information about this variable can be retrieved:

Negative values indicate different types of missing values:

Code	Label	Description
-99	Don't know	Only if this option was provided in the questionnaire
-88	No answer	No box ticked/no answer given
-77	Not applicable	Not answered due to filter question
-66	Question not asked	Not asked in a country/mode
-55	Other missing	Answers that could not be coded, fun answers
-44	Interrupted interview	Only for telephone and online modes (only in web and telephone mode)
-33	Not available in reduced version	Answers not available in the download version
-22	Refusal	Only if this option was provided in the questionnaire (only in long version of wave 6 and in residence history calendar questionnaire in the wave 8 telephone interview)

Notes contain further specificities for the respective variables. In general, the following information can be found in the notes:

- Question was not asked in one or more modes.
- Question was not asked due to filter question.
- Further variables closely related to the variable.
- Variable is not included in the reduced version of the data set.
- Multiple answers are possible.

In general, all variables reflect questions included in the questionnaires. However, several adaptations were necessary, which can pertain to the following procedures and which can be identified by a certain ending of the variable name:

1. Generated variables (variable name ending with G)

Example: The variable `y9_a_iseiG` informs about the international socio-economic index of occupational status of the respondent's apprenticeship. It was generated using detailed information in which profession he/she is doing an apprenticeship in.

2. Country-specific variables (variable name ending with CS)

Example: Due to divergent educational systems in the four CILS4EU countries, categories for respondents' current situation differ sharply between countries. Therefore, a country-specific variable `y9_csit4CS` is included in the data set that contains a total of 20 categories for every answer possibility in the four countries.

3. Harmonized variables (variable name ending with H)

Example: The current situation `y9_csit4H` were harmonized for England, Germany, the Netherlands and Sweden. This means that categories were made comparable in the respective harmonized variables by combining several categories. The harmonized variable distinguishes "school", "apprenticeship/work-related training", "studying", "full-time job", "internship" and "something else". Original answers are still available in the country-specific variables (see above).

4. Reduced-version variables (variable name ending with RV)

Example: Complete information on the respondent's apprenticeship's 4-digit ISCO code `y9_a_isco08` is not available in the reduced version of the data. Instead, we offer a reduced version of this variable `y9_a_isco08RV`, which entails the 2-digit ISCO code. This variable is also included in the full version of the data.

3 Tracking data set

The tracking data set provided for CILS4EU contains information about the participation status of every respondent in the data sets. Differences exist in the sampling strategy of respondents who have been part of the sample since wave 1 (panel interviews) and those who were sampled in wave 6 (refreshment interviews).

Panel interviews

For the panel interviews, the tracking data set contains general sampling identifier information on school, class; and student level as well as information on implicit and explicit stratification criteria used during the sampling process (stratum, school type and regional information). Additionally and most importantly, the data set contains information about the participation status of every student attending one of the randomly selected classes in participating schools in wave 1, thus being part of the student gross sample. The participation status variables furthermore distinguish between different modes of participation as well as – where available – reasons for non-participation.

Refreshment interviews

Refreshment cases who participated in wave 6 are also part of the tracking data set. The gross sample for the refreshment cases is not provided and thus, no information about non-participation is available.

6.2 Appendix G: Differences Between Full-Version and Reduced-Version

Due to data security reasons, two different versions are available for each data set: (1) a version with complete information collected during the survey (full version) and (2) a version in which specific information was reduced and aggregated in order to prevent the identification of single respondents (reduced version).

The structure of the full version and the reduced version of the data set is identical. This means that in both versions the same variables are included, but the variables encompass different information depending on the version of the data set. Variables with reduced or aggregated information are marked with an “RV” at the end of the variable name.

In the following overview, the differences between the full version and the reduced version of the data are listed.
